ABOUT ME

As a computer science graduate with experience in front-end development and a good foundation in Java-based data structures and algorithms (DSA) and familiarity with automation tools, my objective is to achieve a dynamic software engineering role dedicated to applying theoretical and practical skills to drive innovative projects and work alongside talented industry professionals. With a passion for creating efficient and user-centric solutions and comfortable working in a fast-paced setting and adaptable to change, I am committed to continuous and consistent learning and staying abreast of emerging technologies. Looking for a position that allows me to use my technical proficiency, strong analytical abilities, and creativity to solve complex problems and make meaningful contributions to the field of software development and engineering.
